ABOUT US

American Software Resources delivers proven, real-world solutions to technology and IT personnel placement. We offer a broad range of staffing options and solutions, encompassing all IT requirements, software programming and application development. These services can be outsourced directly to us or handled by one of our associates overseas. ASRs has business relationships with some of the most reputable companies in the IT domain, and we routinely assign our consultants to projects on behalf of leading global corporations.

System Engg. & Administration

We employ some of the premier system engineers & administrators available. Depending on your needs, our experts can help design, build & administer, broad-based server solutions for your web applications, database email, file sharing printing & other services.

Network Engg. & Design

We have highly skilled & experienced network engineers on staff. Whether you are simply maintaining your existing LAN or building a global enterprise of far reaching remote offices, our professionals can design & implement in cost effective & efficient manner.

Project Mangement

Our consultants have skills & expertise to ensure that all phases of your projects are defined, initiated & managed properly, from planning & business analysis to cost estimation & budgeting, through hardware & software selection, to final implementation & rollout.

Enterprise Resource Planning (EPR)

We provide experienced consultants to assist with EPR services, at all phases of implementation, from planning strategic objectives to final implementation & post-production support. Our knowledge & experience will help you formulate the best business solutions.
